

A unified cloud native platform to manage, operate and protect everything you run in cloud.

The cloud environment is more complex and dynamic than ever before. OpsMotor provides an agent-less, cloud-native, unified platform that puts you in full control of everything that you run and operate in cloud.

Cloud security simplified with AI

Don't need to spend on individual solutions, like CNAPP, Vulnerability Management, FinOps, and GRC systems. No wastage of time and resources in integrating them.

What OpsMotor brings to the table:

Visibility

You can't protect what you can't see. We provide full visibility and contextualisation of all your multi-cloud assets.

FinOps

Most companies struggle to keep budgets aligned. We provide full visibility on your cloud spend. We also provide full asset inventorization.

CNAPP

We ensure your production teams see the security alerts and they can act swiftly upon them. We provide detailed instructions through our AI on how to solve them.

Vulnerability Management & EASM

Manage your most critical vulnerabilities and resolve them quickly with AI assisted remediation. We also proactively scan your environments externally like hackers would for any open ports and vulnerable assets.

IaC Analysis and Code Security

Enable shift left security in your organization by continuously scanning your code and packages before they get deployed into cloud. This enables your development team to resolve security issues before they get into production.

Policy & Compliance

Reduce your business risks by enforcing your corporate security policies. We also continuously scan against compliance standards and alert you on discrepancies.

Unleashing Multi-Cloud's full potential is Our Mandate

- ➔ Unified platform for full control
- ➔ Real-time alerting
- ➔ Hyper automation
- ➔ AI assisted auto remediation
- ➔ AI powered alert prioritisation
- ➔ Compliance & policy management

OpsMotor Differentiators

Unify Cloud Security
in single platform

Immediate ROI,
Easy Onboarding

AI driven
Cloud Security

Reduce business risk
by built-in compliance
and policy frameworks

Reduce Cost and
visibility of assets
across multi-cloud

Contextual awareness
with graph for faster
remediation

 OpsMotor

“

OpsMotor platform allowed me to consolidate all our security controls in a single platform. It was extremely easy for us to adopt, and their AI helps solves some of our biggest challenges in alert fatigue as well as quick remediation”

★★★★★
